Stationary PVA glue spreaders

GV

Vertical PVA glue spreader

The glue spreaders are designed for vertical glue application to the surfaces and edges of flat workpieces. The application roller applies glue from the side. The spreader has a stationary design or is equipped with conveyors.

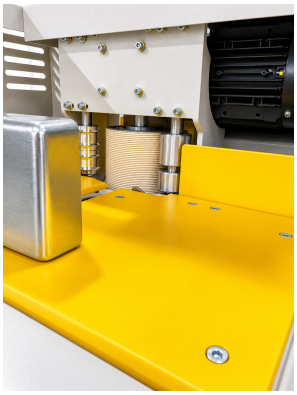

Key features

- Vertical roller application
- Double-sided application available
- Stationary design

Working height	Working width	Working length
20 - 80 mm	**20 - 160 mm**	**250 - 3000 mm**

GV
